COMPANY PROFILE

Hong Kong Binance Network Technology Co., Ltd

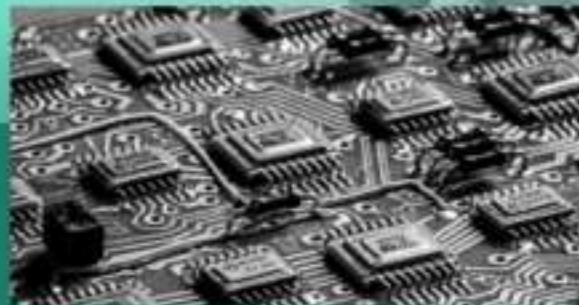

Established in 2017, headquartered in Hong Kong, it is currently a professional company with exquisite technical strength and team integration worldwide. The GQL Quantify platform will officially enter markets in various countries in 2023. We are committed to intelligent quantification platforms. The GQL Quantify platform has established long-term and stable strategic partnerships with multiple international cryptocurrency exchanges, currently serving internationally renowned cryptocurrency trading and treasury currencies such as BINNCE, COINBASE, HUOBI, OKX, BYBIT, COINCHECK, BITSTAMP, MEXC, LBANK, PHEMEX, etc

Mature business model

GQL Quantify was established in Hong Kong in 2017, with the full name Global Quantitative Leader. It is committed to the research and innovation of global blockchain technology, transaction services with cryptocurrencies, asset custody, as well as network security and operations. With its mature business model and core technology, it has created rare achievements in the field of blockchain, and has also won numerous technological innovation awards from the Global Blockchain Alliance for consecutive years.

Qualifications and certifications

As an artificial intelligence team, the company has carried out a series of compliance work, and the foundation adheres to the core value concept of "pragmatism, ethics, win-win, and innovation". It is determined to become an international foundation that can create huge social benefits and value, and has strong capital operation capabilities. With blockchain technology as the core, we are committed to establishing and promoting the token ecosystem under the token economy, and have established the GQL Quantify laboratory to incubate various industries and contribute to the development of artificial intelligence.
